Market Fire Insurance Company, No. 37 WALL STREET, New York City; Cash Capital, ALL PAID UP, of \$200,000; Surplus upwards of \$225,000; all securely invested according to the laws of the State; insures respectable parties against disasters by fire, on Merchandise, Household Furniture, Buildings, and the better class of risks generally, at the lowest rates consistent with the security of its policy holders and the conservative character of its management. The business of the company is conducted on the PARTICIPATION PLAN, so successfully pursued by it for several years past, by which seventy-five per cent of the profits, instead of being withdrawn from the company in dividends to stockholders, are divided annually to the customers, in Scrip, bearing interest, according to the conditions on its policies; and the fund represented by said scrip is safely invested and held for the increased security of its policy holders, and the protection of the capital; thus, those who furnish the business and pay the premiums derive the largest share of the profits. When the accumulations of the "scrip fund" shall exceed the sum of five hundred thousand dollars, the excess will be applied to pay off the scrip in cash, in the order of its issue; all this without the least liability on the part of the policy holders. The liberal and prompt adjustment of claims for loss, when fair and square, is a specialty with this company. This company does not write on the hazards of river, lake, or inland navigation, confining itself strictly to a legitimate fire insurance business. Asher Taylor, President; Henry P. BOSTON TO NEW YORK.—NEW AND SHORTER LINE, via Taunton, Dighton, and Somerset.

(Sundays excepted), at 4.30 and 5.30 P. M.

BOSTON, NEWPORT, & NEW YORK LINE,

(FORMERLY FALL RIVER LINE,)

BETWEEN

Boston and New York, via Newport.

THE NEW FIRST CLASS STEAMERS

NEWPORT

AND

OLD COLONY.

Cars leave the Old Colony and Newport Railway Depot, corner of South and Kneeland Streets, every day (Sundays excepted), at 5.30 P. M., connecting with the above Steamers at Newport.

FARE ALWAYS AT THE LOWEST RATES.

The Boats of this Line land at Pier No. 28, North River, foot of Murray St., New York, in the immediate vicinity of both Lines of California Steamers, and all Ferries, Steamboats, and Railroads going North, West, South, and South-west.

For Change Time, see Daily Papers and Railway Guides.

Passengers by this route can take the 4.30 P. M., Express Train, and arrive in Newport 50 minutes before the Steamboat Train, giving time to secure State-Rooms, and make other preparations for the passage. This line has a decided advantage over all others, being much less of Railroad — only 67 miles — occupying only two hours and one quarter arriving at Newport.

You then go on board one of the elegant and commodious Steamers, — suppers being served to all who wish, soon after getting on board. You have a good night's rest, and arrive in New York early the following morning, refreshed and ready for the duties of the day, as much as though you had remained at your own homes. This is admitted by all as the most desirable route, for comfort and ease, between Boston and New York.

This line also connects with all the Southern and Western Boats and Roads from New York, going West, South, or South-west.

TRUSSES.

A large assortment of best patterns from which to select, to meet the requirements of each case. If convenient, persons requiring Trusses should call at our establishment, where they can have a suitable truss carefully fitted by a competent and experienced person familiar with the anatomy of hernia. When a call in person is impracticable, a careful description should be sent, stating whether the rupture is on the right or left side; also the measure around the person two inches below the top of the hip-bone. If the rupture is at the navel, the measure should be around the body at the navel.

ELASTIC HOSE,

For varicose Veins, Swollen Limbs, and Weak Joints. Of these goods we have several classes of silk and cotton, possessing different degrees of elasticity, the stout silk being usually the most satisfactory. The sizes are, full length (of leg), three-quarters, half or knee hose, knee-caps, and anklets.

FIRE! FIRE! FIRE!

DELAY MAKES THE DANGER. Till now fires have only been met by means *too dilatory, too late, and too cumbrous.* The time lost in sending for an engine and getting it into working order has too often proved a fatal delay.

THE EXTINGUISHER,

a self-acting, portable FIRE ENGINE, is inexpensive, and so simple in its construction that the mere turning of a cock puts it into full action. *Warranted harmless to life, health, and property.* Always ready for instant use. So portable that a man carries it without hindrance to active exertions. For

Manufactories, Warehouses, Railway Depots, Public Buildings, Hotels, and Private Residences, it is indispensable; and for Steam and Sailing Vessels it is as vitally necessary as a Life-boat or a Life-preserver.

It occupies but little space, contains a chemical liquid (perpetually renewable), and is equally efficacious at any lapse of time. So simple that a boy can charge or manage it.

IMPORTANT TO SHIP OWNERS.

HEBARD'S BINNACLE OIL.

We claim this Oil as one of the most important discoveries of any age. It is harmless and safe as Sperm Oil, as it is *perfectly unexplosive*, which at once renders it the most valuable and desirable production ever presented. It is without a rival as a

BINNACLE AND TOP LIGHT

for vessels while at sea. It will not go out (if the lanterns are properly ventilated) during the most violent motion of the vessel in storms.

It will keep in any climate, improve with age, and remain perfectly limpid in the coldest latitude. It may be stowed anywhere on shipboard without danger to life, ship, or cargo. It is, therefore, of infinite value not only to shipowners, but to underwriters and crews. No ship should go to sea without it, as it is both safe and reliable in heat or cold.

Below we give a few of the many testimonials of those that are using it.

The above Oil, and tubes to go with it, may be had, wholesale and retail, of

B. F. HEBARD & SON,

149 BROAD STREET, BOSTON.

Also, Kerosene, Fluid, Lubricating, Lard, and our celebrated Water Oils.

TESTIMONIALS.

Office of the Boston, Norfolk, and Baltimore
Steamship Co., BOSTON, March 30th, 1866.

Messrs. B. F. HEBARD & SON:

Gentlemen,—This is to certify that I have been using your Signal and Binnacle Oil for some time, on board the steamship "Geo. Arnold," and find it to be the cheapest oil, and giving the best light, of any I have ever used.

Yours respectfully,

S. HOWES,

Captain of Steamship "Geo. Appold."

Office of the Neptune Line of Steamers,
BOSTON, March 31, 1866.

Messrs. B. F. HEBARD & SON:

Gentlemen,—This is to certify that I have used your Signal and Binnacle Oil for more than six months, and I can truly say, I never had such good lights before using your oil, as it remains perfectly limpid during the coldest weather; and I consider it perfectly safe under all circumstances.

Yours respectfully, C. G. BAKER.

Captain of Steamship "Neptune."

PORTLAND, April 2, 1866.

Messrs. B. F. HEBARD & SON:

Sirs,—This may certify that we have used your Binnacle Oil for our signal lights only, during the winter, and have found it the best for that purpose we have ever used, as it gives a better light with less trouble. I have no hesitation in recommending it to others, for that purpose, as the best oil we have ever used.

Very respectfully yours,

JNO. J. LISCOMB,

Master of Steamer "Montreal."

BOSTON, April 4, 1866.

Messrs. B. F. HEBARD & SON:

Sirs,—This may certify that I have used your Binnacle Oil for our signal lights for some time, and have found it the best for that purpose I have ever used, as it gives a better light with less trouble and no crusts to wicks; and I have no hesitation in recommending it to others for that purpose as the best oil in use.

R. L. BEARSE,

Steamer "Nereus," of Neptune Steamship
Line to New York and Boston.

Office of the Boston, Norfolk, and Baltimore

Steamship Co., BOSTON, April 6, 1866.

Messrs. B. F. HEBARD & SON:

Gents,—Having used your Signal Oil for about ten months, I can recommend it as the best oil for that purpose I have ever used.

Respectfully yours, W. A. HALLET,
Master Steamship "Wm. Kennedy."

BOSTON, April 6, 1866.

Messrs. B. F. HEBARD & SON:

This is to certify that we use *Hebard's Binnacle Oil* for signal light on our steamers, and can recommend its use as a good article.

GEO. KNIGHTS,

Captain Steamer "Lewiston," Portland

Office of Pitcher, Fuller, & Co.,

BOSTON, April, 1866.

Messrs. B. F. HEBARD & SON:

This is to certify that we have used Hebard's Binnacle Oil, and have found it to suit our customers better than any Binnacle Oil in use.

AMERICAN TOOL AND MACHINE CO.,

(Successors to GEO. H. FOX & CO.,)

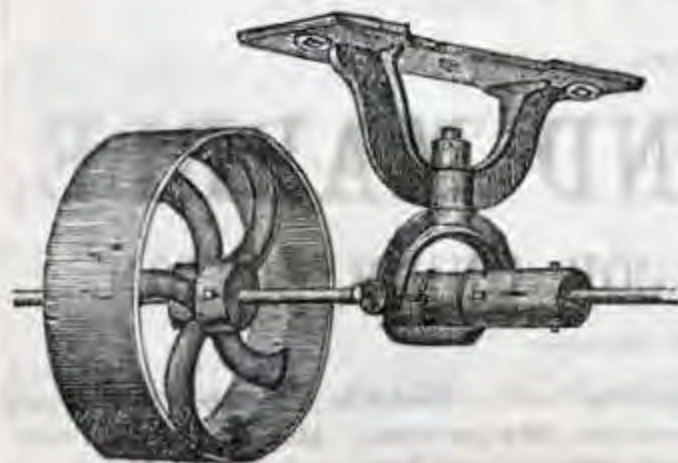

ENGINEERS AND MACHINISTS,

45 KINGSTON STREET,

BOSTON.

Shafting, Pulleys and Hangers, Hand Lathes, Chucks, Slide Rests, and
Belting, on hand and manufactured to order.

The above cut represents a first-class Lathe, with Nason's Patent Screw-chasing Apparatus attached.

N. B. — The American Tool and Machine Co. are the ONLY authorized manufacturers and venders in the United States of the above patented apparatus.

The Lathe is particularly calculated for the manufacture of Steam and Gas Fittings. It is arranged to be used for turning, boring straight or taper holes, boring cocks, facing plain surfaces, and screw-chasing.

This section of Shaft, Coupling, and Hanger, here represented, requires no explanation; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box which adjusts itself to the shaft, and we guarantee it to run six months without re-oiling, thereby saving labor, friction, oil, and the disagreeable, and sometimes destructive, effects of the dripping of oil from above.

CABINET PORTRAITS,

PHOTOGRAPHED BY

J. S. NOTMAN & Co.,

J. S. NOTMAN.

J. M. GATEHOUSE.

174 TREMONT STREET, BOSTON.

"THE CABINET PORTRAITS of Notman & Co. are certainly remarkably perfect specimens of art,—clear, soft, and accurate, even to minutest details. The two now before us—one of Oliver Wendell Holmes, the other of Brignoli, the singer—are not only pleasing as pictures, and correct as likenesses, but full of character."—*Boston Transcript*, April 15, 1867.

"J. S. NOTMAN & CO.'S CABINET PORTRAITS are regarded as the most fashionable that have ever been introduced to the public."—*Boston Traveller*, March 30, 1867.

"These gentlemen lately received sittings from Madame Ristori and Signor Brignoli, and the pictures of these celebrated *artistes* furnish some of the finest cabinet portraits that we have ever seen. We noticed also, and with particular reference to its artistic merit, a portrait of Mlle. Ristori, the daughter of the great tragedienne."—*Saturday Evening Gazette*, May 4, 1867.

"Their superiority as Photographic Artists is beyond question. They challenge comparison. The merit of their work leaves no doubt of their success here, which is already assured. Their establishment is already a fashionable resort, and their photographic specimens are of the highest excellence."—*Boston Courier*, March 14, 1867.

SOLAR GAS MACHINES,
 FOR LIGHTING
 PRIVATE DWELLINGS, CHURCHES, HOTELS, AND FACTORIES,
 In any Locality, at as cheap a rate as Coal Gas is afforded in the largest cities.

We manufacture eight sizes of the SOLAR GAS MACHINE, ranging from ten to five hundred light capacity. Every machine is put in operation and fully tested before it is sent off, and is guaranteed to give perfect satisfaction. This new apparatus is the result of fifteen years of experience in this special line of manufacture, and we feel warranted in asserting that our machine excels all others of a similar kind in the market. It is much simpler and more efficient than any former manufacture, and is constructed with special reference to safety and durability. There is no possibility of an explosion under any circumstances whatever, nor is the gas tank likely to leak or give out, or any part of the machine to get out of order, if reasonable care is taken of it. From five to fifteen minutes daily attention is all that is required to keep any size of machine in perfect working order to supply all the burner jets in a dwelling or factory.

The SOLAR GAS is manufactured by the admixture of ATMOSPHERIC AIR with the VAPOR OF GASOLINE. The gasoline is contained in the tank A, and the air is supplied by an air-forcing pump located and operated within the cylindrical case B, C. The pump is revolved on shaft D by means of cord E, pulleys F, and weight G. The latter is arranged to wind up like a clock weight by applying the crank P to the projecting end of shaft or winding-drum D, the weight G acting as the propelling power to revolve the air pump, and thus force air in contact with the volatile gasoline fluid which is exposed to the action of the air by means of an absorbent vaporizer.

Gasoline is a volatile hydro-carbon fluid obtained from crude petroleum and bituminous coals, and is an article of regular manufacture by all coal-oil and petroleum distillers, and is furnished to the consumer at an average of fifty cents per gallon, at that price it will furnish a ten candle-light at five-sixths of a cent per hour. Five gallons is estimated equal to one thousand cubic feet coal gas.

Reliable Agents wanted in every State to introduce

THE SOLAR GAS MACHINE.

Constantly on hand, DRAKE'S METALLIC GASOLINE BARRELS AND GASOLINE.

Gas Fixtures and Burners Adapted to Burning the Solar Gas.

ROBINSON'S PATENT SYSTEM OF VENTILATION,

FOR CHURCHES, SCHOOL-ROOMS, PRISONS, STABLES, FACTORIES,

FOUNDED ON THE ONLY CORRECT THEORY OF VENTILATION,

Has been applied in many hundreds of cases, with universal success. On page 37 of the Boston School Report for 1863, see this:—

"In the nearly, or quite, unanimous opinion and experience of the members of the School Board, the system of ventilation represented by Robinson's Instruments is the best now in the market. Their judgment, in this respect, is based, not upon mere theory, but on positive, indisputable facts. In the Bowditch Grammar School-House, and in the Primary School-House on Harrison Avenue, the success of these ventilators has been complete and entirely satisfactory, and CANNOT BE QUESTIONED."

NEW FASHION FOR 1867.

SHERMAN'S NEW PATENT AS YOU LIKE IT SKIRT.

THIS is not only a new fashion, but a new article of Skirt, made on an entirely new principle, so novel and yet so perfect, that the ladies contend it should be called *Perfection*.

We would here call particular attention to the As You Like It, or flexible joint, extending down the front of the skirt; it is so constructed that the springs fold inwardly, but not outwardly, and readily yield to the slightest pressure, thus allowing them to collapse, so that the skirt occupies the smallest possible space while sitting, riding, or in passing through a crowd, and yet the moment the pressure is removed, the skirt resumes its original and beautiful shape.

The novelty and utility of this contrivance needs but be seen to be appreciated.

But for want of space we might here publish thousands of extracts from letters we are daily receiving, speaking in the highest praise of these Skirts.

The following is a fair sample. An eminent female writer has said of these Skirts:—"Volumes might be written in their praise, but to be properly appreciated they must be seen and tested; they are perfection itself."

Another lady speaking of them, says:—"The satisfaction I derive from the use of my AS YOU LIKE IT SKIRT is worth its cost each day I wear it."

We would also call particular attention to the As You Like It adjustable clasp, or double fastening for the band of the Skirt; it is so constructed that you instantly adjust it to the size of the waist, and once right, always right. It also prevents the Skirt band from folding or wrinkling, and is universally acknowledged to be the most complete article of the kind in use.

Lastly, we would call your most careful attention to the superior quality of the material and workmanship of our skirts, every part of which are made in our own factory, with a special view to having them excel all others in style, finish, and durability; and they will wear at least three times as long as any other skirt in use. Each skirt before it leaves the factory has to undergo a rigid examination, and is not allowed to pass unless it is perfect in every particular. We ask but a trial, and are sure of your future patronage. Manufactured by the SHERMAN SKIRT AND CORSET COMPANY, exclusive owners of the patent for the United States.

Marine, Stationary, Portable, Pile-Driving and Hoisting STEAM ENGINES.

We would call the attention of the public to our IMPROVED PORTABLE STEAM ENGINE, in which all the working parts of the Engine are built on an iron frame (like a common Stationary Engine), thus avoiding the heat from the boiler to the working parts of the Engine, and the strain on the machinery caused by the expansion of the boiler; making both Engine and Boiler more durable than the usual style of Portable Engines.

These Engines are designed for all purposes where Stationary Engines could be used, and for loading and unloading vessels, Pile-Driving, small Steamboats, and Mining purposes.

They do not require any brick-work, and are ready for operation on delivery. The Boilers are warranted to carry 100 lbs. per inch.

Portable Engine, Upright Boiler. From 4 to 12 Horse Power.

Pile-Driving Engine.

We use a Patent Regulator-Valve movement on our Stationary Engines, which, for economy and perfect regulating, is not surpassed.

Having erected a new and commodious Shop, we are prepared to make SHAFTING, PULLEYS, SAWMILL, MINING AND PUMPING MACHINERY, and all kinds of MILL-WORK, with dispatch.

PORTABLE ENGINES constantly on hand. Altering and Repairing done at short notice.

HICKS'S STEAM ENGINE,

MANUFACTURED BY THE
SALEM MACHINE COMPANY.

This Engine possesses many advantages over all other Engines now in use, surpassing them in economy,—namely, in first cost, in consumption of fuel, in lubrication, in attendance, in foundations, and space.

Being a double Engine, supplied with four pistons, receiving steam at four points in each revolution, it has no dead points; consequently, it requires no heavy balance-wheel to equalize its motion.

It dispenses with all external contrivances to convey steam to the pistons, as employed in other Engines. Each piston is so constructed that it is an induction and exhaust valve for the one beside it—thus saving all the friction of other Engines, except that of the piston itself.

Parties requiring Steam Engines will do well to give this a careful examination before purchasing.

DAVID CLAPP & SON.

Buerk's Watchman's Time Detector.

The above engraving is a view of a Time Detector, which is carried about by the watchman to all the different stations to be guarded. At each station is a small key, securely fastened to prevent his taking it with him. The watchman goes from station to station, takes the key fastened there, inserts it into the clock, gives it one turn, and goes on to the next, or to any other station, for he is not bound to go in regular order. By this it follows that a perfect record will be kept of each operation.

The broken-out portion of the watch shows the mechanism which operates the pin which pricks the paper. At A, there is a number of sliding bars which connect with the pricking points, so that, by turning round the key, the ward on it strikes a certain bar and penetrates the dial-paper B. By that act, a small hole is made in the paper, which tells what time the man appeared at each station; how often he came there; how long he stopped; how long it took him to go from one to another; whether he went in regular order or not; in short, it gives a complete record of his night's work.

BUERK'S

Watchman's Time Detector.

This WATCH-CLOCK was introduced to the public in almost every section of the United States and Canadas, several years ago; and it has proved itself to be the best invention in the world for testing the faithfulness of Watchmen. Since its introduction, the Proprietor has improved on some parts, and corrected deficiencies which have been suggested by using it; and he has now a perfect check upon the Watchman. With other clocks, a regular routine has to be followed, but with this a Watchman can be ordered to visit any particular place as often as required, without being compelled to go to places where it is not necessary to visit as often.

The instrument is complete in itself, portable, and as reliable as the best lever watch.

It is not so likely to become disarranged in its works as a good watch, because its parts are stronger. But when it needs cleaning, any common watchmaker can adjust it, its mechanism being simple.

It requires no fixtures or wires communicating from room to room, as is the case with the ordinary Watch-Clocks; a small, inexpensive, stationary key is alone required at each station.

Its use is not restricted to a single building, and places can be guarded that it would be impossible to guard with any other instrument, such as Railroad Tunnels, Bridges, Yards, Shops, &c.

It is very essential to carry the clock secure, taking care that it is not brought in contact with any hard substance, and thereby broken. I have on hand pouches with straps to go over the shoulder and around the body, which I will send with the clock, if ordered. Price, \$2.50.

The instrument will in all cases be warranted perfect and satisfactory.

Its price is invariably **Seventy-Five Dollars**, Cash on Delivery, including as many Keys as are requisite, not exceeding twelve.

THIS WATCH-CLOCK IS SOLD AT A LESS PRICE THAN ANY OTHER IN THE MARKET.

The DETECTOR is used extensively by large Manufacturing Establishments and Railroad Companies in the United States, from whom numerous testimonials have been received.

N.B. Parties purchasing these Clocks should test them sufficiently in the counting room or office, as they will not be taken back after having been injured by the Watchman through carelessness.

 This Detector is covered by two U. S. Patents. Parties using or selling these instruments without authority from me will be dealt with according to law.

All Communications promptly attended to.

OF HARTFORD, CONN.

President, E. A. BULKELEY.

ASSETS, \$5,000,000. ANNUAL INCOME, \$3,500,000.

The growth and progress of the ÆTNA LIFE INSURANCE COMPANY since 1862, when it adopted its mutual plan, with new features and improved methods of Insurance, has been such that its receipts now average more a week than they were for that entire year.

This popular appreciation which, during this period, **INCREASED ITS BUSINESS FIFTY-TWO TIMES**, is further shown by the fact, that **OVER 15,000 ADDITIONAL PERSONS SECURED POLICIES** in it during the past year.

Its economy, sagacious management, care in selection of risks, as shown by its small expenditures and large receipts, enable it to pay **A DIVIDEND OF FIFTY PER CENT**, and **INSURE ITS MEMBERS** at the lowest possible cost.

ACKNOWLEDGMENT.

I deem it but justice to Dr. G. B. Emerson, to make the following acknowledgments:—One year ago I was suffering very much from Deafness, Catarrh, Dyspepsia, Liver and Kidney complaints of long standing. At this time I received of Dr. E. thirty examinations without seeing him once. At the end of the course, I was so much benefited thereby that I considered myself nearly or fully cured. My age is upwards of seventy. I have not enjoyed so good health for many years. My prayer is that God may bestow a widow's blessing upon Dr. E., and increase his gift, and make him instrumental in blessing the world more abundantly.

PATENT FANCY LOOM,

Adapted for weaving every kind of narrow fabric, such as

**Tapes, Ribbons, Webbing, Galloons,
Bindings, Suspenders with Woven
Button Holes, Plain and Elastic,
Rubber Goods, &c.**

The inventor has devoted years of study and experience to improvements in machinery for the manufacture of the above-named, and many other kinds of narrow fabrics never before produced in this country; and, in addition, the company build Improved Machines for preparing and finishing the goods, consisting of Spoolers, Warpers, Quillers, Dressing, Calendering, Winding, Folding, and various machines used in the manufacture of Narrow-Ware Goods, all of which are secured by Letters Patent.

We also manufacture a superior Fancy Loom, for weaving all and any kind of Fancy Goods, either cotton or wool, heavy or light, with Knowles' Patent Drop Shuttle-Box. Every motion of this Loom is positive, and cannot make a mispick, either on the harness motion or Drop Box, and can be run at great speed.

We also manufacture a new Patent Cam Loom, with or without Drop Box, from two to eight harness as desired, for weaving Satinet, Doeskins, Jeans, Flannels, plain or twilled, of wool, or Denims, Tick, Duck, or any kind of heavy cotton or linen goods.

The proprietors, in bringing this loom before the public, are confident that they are only to be seen in operation to convince any one, that, as they are in their mechanism an entire departure from all the old paths, so they are greatly in advance of any looms now in use. They are simple, easy to be understood, and will weave with less damage or breaking of warp than any other Loom.

The above Loom received a Gold Medal at the Fair of the Massachusetts Charitable Mechanics' Association in 1865, and at the Fair of the Worcester County Mechanics' Association in 1866; and is acknowledged to possess decided advantages over any other Loom yet invented.

PATENTED IN ENGLAND AND FRANCE.

This Pump has received the HIGHEST PREMIUM at every Fair where it has been exhibited; viz., New York, Boston, Baltimore, Cincinnati, Buffalo, Syracuse, Springfield, and Worcester. It has no Cranks or Fly Wheel, and has no dead points where it will stop; consequently, it is always ready to start without using a starting bar, and does not require hand-work to get it past the centre, and is the only Pump made that will work its steam valve with water, — consequently is always ready to start when the steam cylinder is filled with cold water of condensation. It has been used for more than eight years for feeding stationary STEAM BOILERS; and has been used more than five years on LOCOMOTIVES, and is the

only Steam Pump yet tried that is in every way adapted for that use. It has been extensively used for pumping water for

Hotels, Public Institutions, and Manufacturing Establishments

of every kind, with perfect success. It has been tested in the Navy, and, in consequence, is recommended by the Chief Engineer of U. S. Navy, to be used at the Navy Yards and on Steamers. As a Fire Engine, it is recommended by all Insurance Companies, and is universally adopted by the Manufacturing Companies in New England. Although we have been constantly making additions to our works, yet the rapidly increasing demand for our Pumps has hitherto been greater than our possible production. But with recent enlargement of our works, and extensive additions to our manufacturing facilities, we hope to be able to supply all orders. The Proprietors offer this Pump as the most PERFECT INDEPENDENT STEAM PUMP ever invented, and for SIMPLICITY AND DURABILITY DEFIES COMPETITION.

For further information, address the Proprietors at their works, WARREN, MASS.

A NEW STOVE

ON A NEW AND MODEL PLAN.

CHILSON'S CONE-DISK STOVE.

This is a plan for a Stove that has long been wanted for *greatly economizing in the consumption of fuel* in warming offices, stores, workshops, railroad cars, factories, &c. It has been got up after a long and careful study, expressly for economy in fuel, and for warming the air in the lower part of the room, as well as the floor, for a great distance around the Stove instead (of its ascending to the upper part of the room, as is the case with the common Stoves) and for keeping a continuous fire day and night. When once seen in operation, it will convince every one of its great superiority. It is very simple to manage, and is made in the most substantial and durable manner, wholly of cast iron, of a new and beautiful design. Sizes suitable for rooms from 15 feet to 100 feet square.

ALSO A NEW OVALED PARLOR STOVE,

Just finished, April, 1867, of a new and beautiful design. Also several sizes of

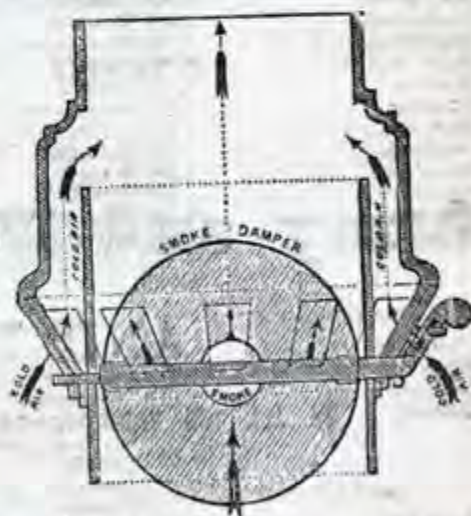

CHILSON'S NEW COOKING STOVE,

Which has been declared to be the most perfect Cooking Stove in the world. A single examination will prove all that is claimed for it.

DAMPER AND VENTILATOR.

CHILSON'S PATENT Ventilator AND DAMPER COMBINED.

VERTICAL SECTION OF DAMPER AND VENTILATOR.

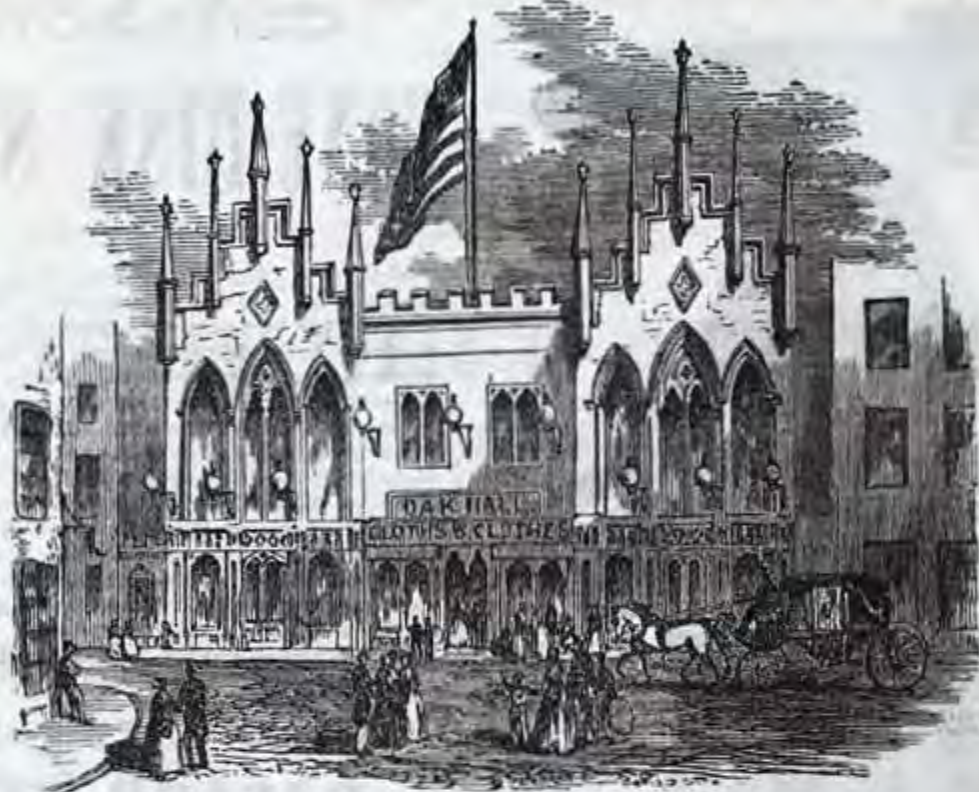

Arranged so as to be attached to the Smoke Pipes of Furnaces, Ranges, Stoves, &c., as well as Steam Boilers, Brick Chimnies, &c., for the purpose of regulating their Fire Draughts, and also for ventilation. Its operation will surprise all who witness it in the great length of time fire may be kept without replenishing with fuel, and in the wonderful economy in the consumption of fuel. Descriptive Circulars of the above sent to any address.
